## About Us

## Company Profile

OUR COMPANY

We are a professional manufacturer of first aid products in China. We specialize in manufacturing a wide range of stretchers, splints, hospital beds, resuscitation beds, water and other life-saving supplies. Our product range is over 300 kinds. We export our products to 49 countries and regions. We have about 1500 customers all over the world. We have an excellent sales team, production team and R&D team. We are the rescue experts around you.

# Company Philosophy

## Values

Love, Dedication, Integrity and Commitment

## Corporate Vision

Create the first brand in the first aid industry

## Corporate Mission

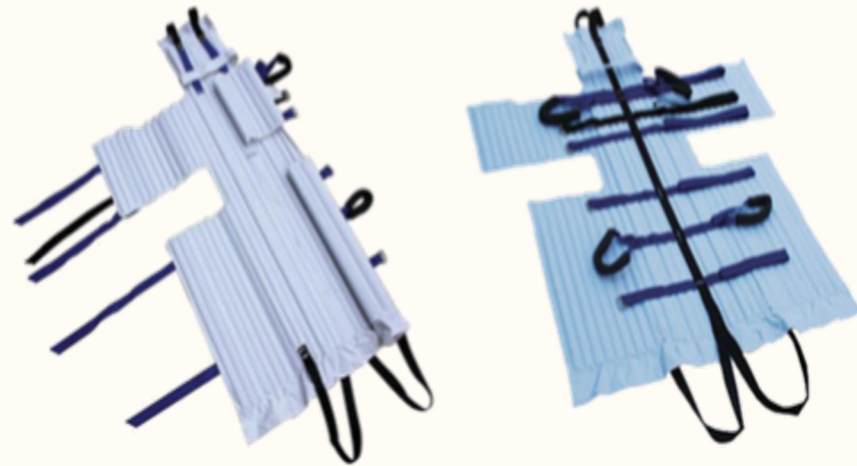

The most professional way to save lives at risk

# Spinal board

This product is also known as spinal board, lifting board, board stretcher, plastic stretcher, fixed lifting board, floating rescue board, spinal board stretcher, etc.

This product is made of high-density plastic polyethylene blow molding, strong and durable, not easy to aging. This product is suitable for all kinds of harsh environment rescue, strong anti-collision performance, waterproof and easy to clean.

Can be X-ray, MRI, CT penetration effect is excellent, convenient for the injured to check, minimize the pain caused to the patient in the process of transport.

Uniform opening of the periphery of the hand opening, can be carried by multiple people at the same time, carrying, lifting. Hard structure, easy to continue CPR and cardiac compression during the transfer process, large drainage capacity, the overall volume of 0.04m<sup>3</sup>, in room temperature water can float an adult, greatly reducing the difficulty of water lifesaving personnel, to facilitate faster rescue of the injured.

Spinal fixation set contains a neck brace, head fixator and spinal fixation plate, this product is generally equipped with three straps.

# Aluminum Alloy Folding Stretcher

This product is also known as stretcher, folding stretcher, aluminum alloy stretcher, chair stretcher, etc.

The frame part of this product is mainly made of high-strength aluminum alloy, with light weight, small size, easy to carry, safe to use and other characteristics.

The stretcher surface is made of orange PVC leather surface, which is waterproof and easy to clean. The car is designed with two wheels at one end and two support feet at the other end, so that the patient can be transferred by lifting one end of the support feet in the case of insufficient manpower. The car can be folded into a chair, the two guides are cheap to move on the ground, convenient to transport or transfer patients in narrow aisles or elevators.

This product is equipped with two safety straps to ensure the safety of the patient on the way to the hospital.

Mainly used in hospitals, outpatient departments, ambulances, firefighters and troops in the field to transport the sick and wounded or enterprises and institutions, rural health offices, homes for the elderly and tourist attractions equipped for emergency use.

# Aluminum Alloy Ambulance Stretcher

This product is also known as stretcher cart, ambulance stretcher cart, low stretcher cart and so on.

The body part is mainly aluminum alloy structure, with light toughness, easy to disinfect the characteristics of the hospital emergency center for the transfer of the wounded.

The stretcher cart adopts sponge cushion and the backrest can be adjusted to make the patient more comfortable to lie down. The stretcher car adopts a low frame structure, which can be moved on the ground, and can be carried on the ambulance to transfer patients. Both ends of the car are equipped with telescopic handles, which make it easy to lift the stretcher car. The wheel periphery is made of rubber, which is strong and durable. It must be locked with the fixing device on the ambulance after boarding to ensure the safety of the patient during the ambulance journey.

The stretcher cart is equipped with two safety straps to ensure the safety of the patient. The stretcher truck is equipped with an infusion rack.

# Scoop Stretcher

YJK-A-4

This product is also known as separation stretcher, shovel stretcher, aluminum alloy shovel stretcher, etc.

Made of high-strength aluminum alloy material, four plates: foldable, detachable and expandable. Foldable design, portable and easy to stack, greatly reducing the space occupied, conducive to large-scale applications.

The detachable design adopts a separate rigid structure to transfer fractures and seriously injured patients. Both ends are equipped with a clutch device, which can be separated into two parts left and right side switch easier to operate, providing better protection for the injured. In the case of not moving the patient, quickly shovel the patient into or extract the stretcher from under the patient's body.

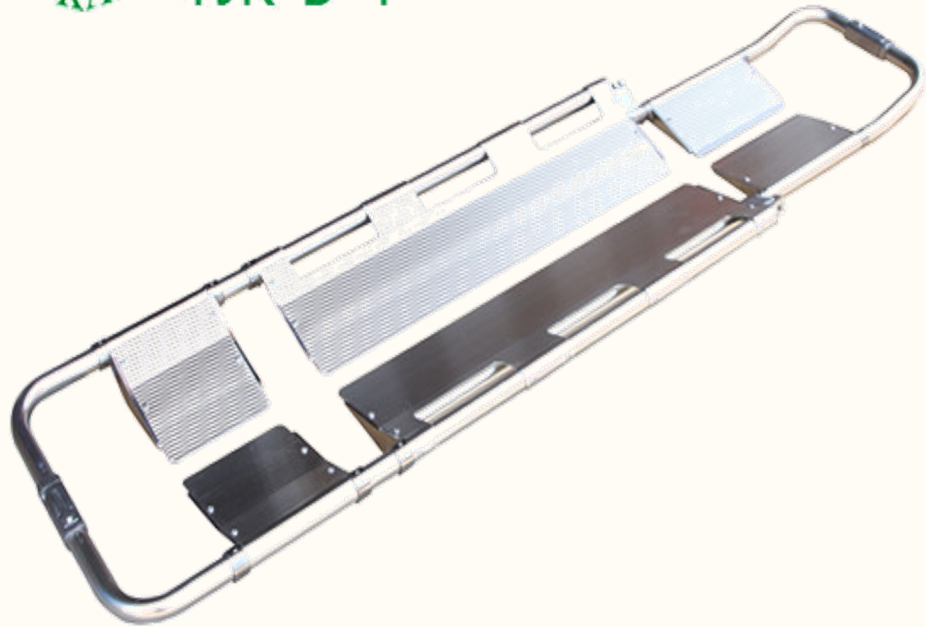

Retractable design, the length of the stretcher can be adjusted according to the length of the person, a total of 3 gears. Narrow frame structure at one end of the stretcher (feet). Suitable for patients of any size and height.

The product is equipped with safety straps to ensure the safety of the patient. The spade stretcher can be used together with the head immobilizer.
